

Assessment and Management of Tree Root Damage to Hardscape

Tree root growth damages hardscape (foundations, roadways, driveways and sidewalks) resulting in costly repair. Tree Associates provides expert opinion regarding the assessment and management of root hardscape damage utilizing Tree Radar Unit (TRU), to reveal the location, depth and relative size of roots near *and even underneath* hardscape. With this information, management options can be provided considering future damage, tree condition and other factors.
